

## Manage Risks, Reduce Costs, and Improve Time-to-Market for Connected Health Deployments

Connected health technologies have shown a steady 30% compound annual growth rate each year as remote care has proven again and again to be an affordable, reliable and efficient way to deliver health care services. The rapid growth is contributed to the physicians, caregivers, and patients alike that have experienced the positive outcomes.

Patients gain a greater quality of life, free from constant appointments and complicated check-ins. Medical staff can spend their time more efficiently and can gather accurate information free of human error. All of these variables combined save hospitals, clinics, and the patients themselves time and money – a great outcome for everyone.

At KORE, we support healthcare companies by streamlining the process of sourcing, provisioning, validating, securing, and connecting mobile devices used for remote monitoring. This is powered by our Managed

Services – a combination of wireless connectivity and network management, device management, and deployment and logistics services. Combined with our upfront solution design and consulting, we ensure you can deliver your solution faster with a reduced total cost of ownership.

KORE customers see lower risk, reduced costs, and improved efficiency in the operation and execution of their connected health initiatives.

Remote Patient Monitoring Market is expected to reach \$1.8 billion by 2026<sup>1</sup>

<sup>1</sup>Grand View Research, Remote Patient Monitoring System Market Worth \$1.8 Billion By 2026

# KORE Provides All Components to Deploy an RPM Solution

## SPEED TO MARKET

- Integration of Wireless Activity & Asset Custody
- Hardware & Peripheral Sourcing
- Kitting & Build-to-Order
- Custom Hardware & Firmware
- Software Image Management
- Peripheral Integration & Bluetooth Pairing
- Regulatory Labeling & Storage
- Distribution Centers in the U.S. & E.U.

## FULFILLMENT

- Direct-to-Patient
- Bulk Fulfillment to Hospitals/Clinics
- Prescriptive & Non Prescriptive Devices
- PCI Compliant Credit Card Processing
- Asset Management, Tracking, & Traceability

## RECOVERY & REDEPLOYMENT

- Direct-to-Patient Recovery Kits
- Bulk Hospital/Clinic Recovery
- Returns Processing, Sanitize, Test, Repair
- New Patient Enrollment & Redeployment
- Client/Hospital/Clinic Inventory Segregation
- Regulatory Reporting

## COMPLIANCE

- ISO 13485/ISO 9001
- FDA 21 CFR Part 820 Compliant
- FDA Registered Repackaging & Contract Manufacturing Facility
- HIPAA Compliant Order Desk
- MDD Validation
- EU Medical Device Law Compliance
- Experience with Device Certification

### Connectivity

Reliable connectivity delivered via a single partner or eSIM with multi-carrier options and flexible, economic rate plans

### Tablet Devices and Modules

Full range of best-in-class tablet devices with iOS and Android options that can be provisioned to desired business specifications, as well as selection of cellular modules to support development of proprietary devices

### Professional Services

Comprehensive endpoint lifecycle management and other professional services including solution design, deployment planning, as well as forward and reverse logistic services to successfully deploy and maintain your Workforce Monitoring solution, as well as Mobile Device Management services to ensure security and help obtain HIPAA compliance
