

XEV DRIVES **URBAN MOBILITY** FORWARD WITH KORE SUPER SIM™

OVERVIEW

XEV is leading the charge when it comes to urban mobility, by providing sustainable, compact, zero-emission vehicles designed for city life. With a commitment to smart, user-friendly transportation, XEV integrates advanced technology to create a seamless driving experience. Their innovative battery-swapping network ensures drivers never have to worry about charging downtime, making urban commuting more efficient and accessible - exactly what cities around the world need as they make the switch to more sustainable modes of living.

THE CHALLENGE

As cities grow more congested and environmental regulations become stricter, the demand for clean, space-efficient, and cost-effective transportation is increasing.

XEV needed a connectivity solution that could:

- Provide reliable traffic coverage across multiple countries.
- Support a broad range of carriers for seamless global connectivity.
- Offer competitive pricing without compromising service quality.
- Operate with a mature and stable business model to ensure long-term reliability.

Additionally, XEV needed a connectivity partner that didn't have minimum consumption policies and the subsequent cost inefficiencies that came with them.

THE SOLUTION

To ensure uninterrupted connectivity for their vehicles, XEV implemented KORE Super SIM, which enables real-time data transmission for navigation, diagnostics, and remote management features. This solution provides:

Reliable global connectivity across multiple networks.

A cost-effective alternative with flexible pricing.

Improved service management with dedicated account support fluent in Chinese, ensuring seamless communication with XEV's China-based teams.

THE RESULTS

Since transitioning to KORE, XEV has seen significant cost savings and operational improvements:

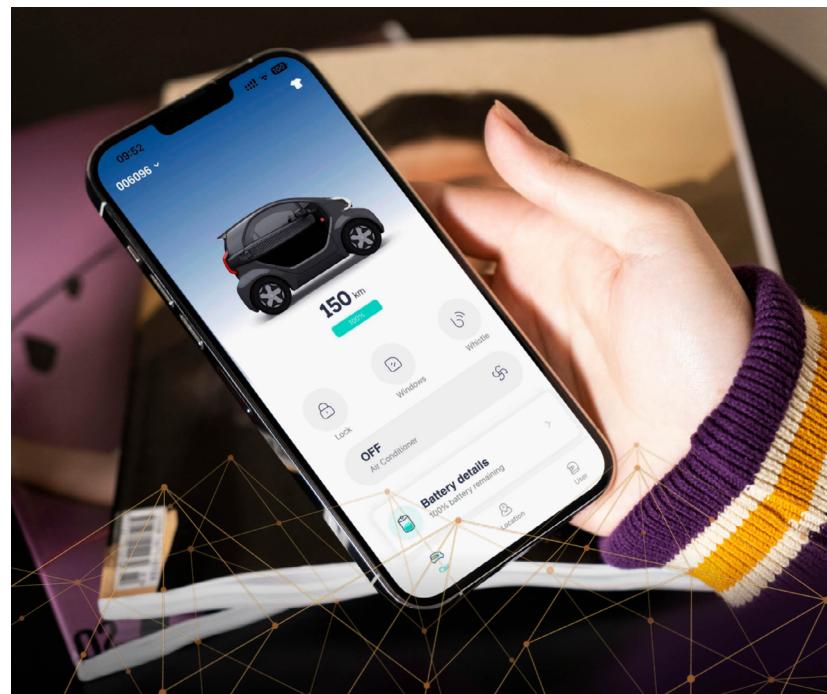

- \$3,000 in monthly savings on connectivity costs.
- 10,000 activated SIMs, powering seamless vehicle connectivity.
- Enhanced communication and support, with KORE's China-based account team facilitating smooth operations.

"We highly recommend KORE for their exceptional service and competitive pricing. The transition to KORE has been seamless, and their support team is always responsive and helpful. KORE has become an invaluable partner in our connectivity solutions."

Jing Feng, XEV Network & IT Director

WHAT'S NEXT FOR XEV?

XEV is set to launch a smart vehicle management app that will allow users to track their vehicles' location, remotely lock and unlock doors, adjust climate settings, and monitor battery status in real time. Through KORE's reliable connectivity, XEV is enhancing the driver experience while continuing its mission to make urban transportation cleaner, smarter, and more convenient.

ABOUT KORE

KORE is a pioneer, leader, and trusted advisor delivering mission critical IoT solutions and services. We empower organisations of all sizes to improve operational and business results by simplifying the complexity of IoT.
