

ANATOMY OF 20 MILLION CONNECTIONS

See how KORE hit its 20 million SIMS, including our growth story, global reach, and the key industries and regions powering this historic milestone. Take a closer look at the scale, impact, and smart strategy behind one of the most trusted names in IoT connectivity.

THE JOURNEY TO 20 MILLION CONNECTIONS

How KORE's strategic growth and innovation paved the way to this historic milestone.

2003-2013

~1.5M Devices

ESTABLISHING IOT PIONEER

- Founded 2003
- Established NA presence with AT&T and Rogers
- Launched 1st Gen IoT platform PrismPro

2014-2018

~3M Devices

BUILDING GLOBAL SCALE

- Global expansion
- Acquired Wyless, Aspider
- Introduced eSIM capability

2019-2022

15M Devices

POSITIONED FOR GROWTH

- Acquired BMP, Integron, SIMON IoT
- Introduced IoT Managed Services
- IoT security
- Established healthcare practice

2023 & BEYOND

20M Devices

ACCELERATION & LEADERSHIP

- Acquired Twilio IoT
- Introduced digital-first user and buyer experience
- Expanded eSIM capabilities
- One-Stop-Shop Customer Experience
- KORE One platform

THE GLOBAL FOOTPRINT OF KORE

A visual snapshot of where KORE's influence and the work of our global teams comes to life.

NORTH AMERICA

Where it all began and where our scale, service, and expertise set the global standard.

EUROPE

A growing force shaped by innovation, compliance leadership, and cross-border agility.

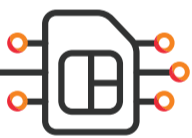

ASIA PACIFIC

Fast-moving, future-facing, and expanding through smart partnerships and regional strength.

SOUTH AMERICA

An emerging market with rising potential driven by local impact and global insight.

OUR SIMS IN ACTION

From fleets to factory floors, here's where our SIM's are putting in the work.

ASSET MANAGEMENT

Helping track heavy machinery across sites. Preventing misuse, improving utilization, and streamlining maintenance.

Tracking trailers and containers in real-time to ensure visibility, support logistics planning, and reduce loss in transit.

Managing tools and parts across facilities to optimize availability, reduce downtime, and automate restocking.

CONNECTED HEALTH

Enabling real-time tracking of vitals and chronic conditions to improve outcomes and reduce hospital visits.

Helping monitor smart pill dispensers and reminders to ensure patients follow prescribed treatments.

Connecting portable diagnostic tools and emergency equipment for faster, more informed care in the field.

FLEET MANAGEMENT

Tracking fleet vehicles in real-time to improve routing, reduce fuel use, and boost on-time delivery.

Helping monitor speed, braking, and idle time to improve driver safety and encourage efficient habits.

Enabling automated service alerts based on mileage and usage to prevent breakdowns and extend vehicle life.

INDUSTRIAL OEMs & SMART APPS

Tracking real-time machine performance to optimize throughput and reduce energy waste.

Helping identify wear and failure patterns to schedule service proactively and avoid costly downtime.

Enabling OEMs to offer connected features like remote diagnostics, usage insights, and over-the-air updates.

CSP & RETAIL

Enabling secure, always-on payment terminals for faster checkouts and better uptime.

Helping track stock levels across stores and warehouses to avoid outages and overstocking.

Powering SIM provisioning, usage monitoring, and real-time service controls for CSPs and retailers.

Did seeing how our connections help real-world partners spark something in you? Join us on the road to **100 million connections**.
